

PRODUCT SCOPE / AUGUST 2026

Condensed MVP

A class-wide knowledge pot that turns scattered notes into organized, personal study tools.

Collect once. Organize together. Study your way.

One class. One shared Pot.

A student creates a Pot, invites classmates, and the class builds one trustworthy body of study material together.

THE PROMISE

**Your class adds the ingredients. Melting Pot organizes them.
Every student turns the result into the format they need.**

CHAMPION

A study group or motivated student starts the Pot and invites classmates.

CONTRIBUTORS

Excellent note-takers lead; everyone else can add, correct, react, or study.

MOMENT

The class needs to gather material and prepare for a chapter, quiz, midterm, or final.

From messy inputs to a study-ready class.

01

Create

Name the class Pot and optionally add chapters or exam sections.

02

Invite

Share one link: 'You are in my class - join our Melting Pot.'

03

Add

Paste notes or upload PDFs, images, slides, links, and study material.

04

Melt

AI extracts topics, formats notes, condenses duplicates, and flags conflicts.

05

Review

Classmates correct the organized guide while originals remain available.

06

Study

Select any sections and generate flashcards, quizzes, summaries, or guides.

Shared knowledge. Personal study outputs.

SHARED CLASS POT

BIO 101

Chapter 1

12 sources / organized

Chapter 2

8 sources / 1 conflict

Chapter 3

15 sources / organized

Midterm

Chapters 1-3 / Mar 18

GENERATE FROM ANY SELECTION

Chapters 1, 2 + 3

Choose an output

Flashcards

Practice quiz

Condensed guide

Key terms

Explain a topic

Cheat sheet

Outputs are personal by default. A student may publish a useful set back to the class.

A small product with a strong center.

Build only what proves that a class will contribute, organize, and study from the same Pot.

SHIP NOW

- Create and join a class Pot
- One invite link
- Chapters, lectures, and exam sections
- Paste notes and upload PDFs or images
- AI formatting and topic organization
- Duplicate condensation and conflict flags
- Original inputs and version history
- Shared guide editing and attribution
- Flashcards, quizzes, summaries, and guides
- Lightweight reactions and activity
-

WAIT

- Canvas and Google Classroom sync
- Full deadline calendar
- Git-style branches and merges
- Public course discovery
- Ranks, streaks, and achievement systems
- Complex role and permission models
- Adaptive learning plans
- School administration
- Semester recaps and certificates
-

Automation without losing the ingredients.

NON-NEGOTIABLE AI RULES

- Never overwrite an original input.
- Every transformation creates a restorable version.
- Show the sources behind generated sections and study items.
- Merge obvious duplicates; flag meaningful disagreement for people to resolve.
- Do not silently rewrite saved personal study sets when class material changes.

TWO-WEEK PILOT

< 5 min

Create or join a Pot and reach useful material

> 1

Contributor in addition to the creator

> 30%

Weekly members who add or improve material

North star

Students consuming material contributed by someone else

Definition of done: one real class builds a useful Pot, returns to it, and studies from each other's work.
