

Frontend Design

A warm, editorial class workspace with a playful melting identity and calm study focus.

Collect once. Organize together. Study your way.

Warm, smart, and a little delicious.

Melting Pot should feel like a beautifully organized notebook shared with friends - not an LMS, developer tool, or AI dashboard.

DESIGN PRINCIPLES

Editorial calm

Generous space, clear hierarchy, and long-form reading comfort.

Visible ingredients

Sources and contributors remain attached to everything the Pot creates.

Playful motion

Bubbles, pouring, and gentle steam make processing memorable.

Human control

AI proposes and organizes; students can inspect, edit, undo, and retry.

PALETTE

Tomato

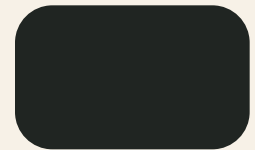

Cream

Sage

Gold

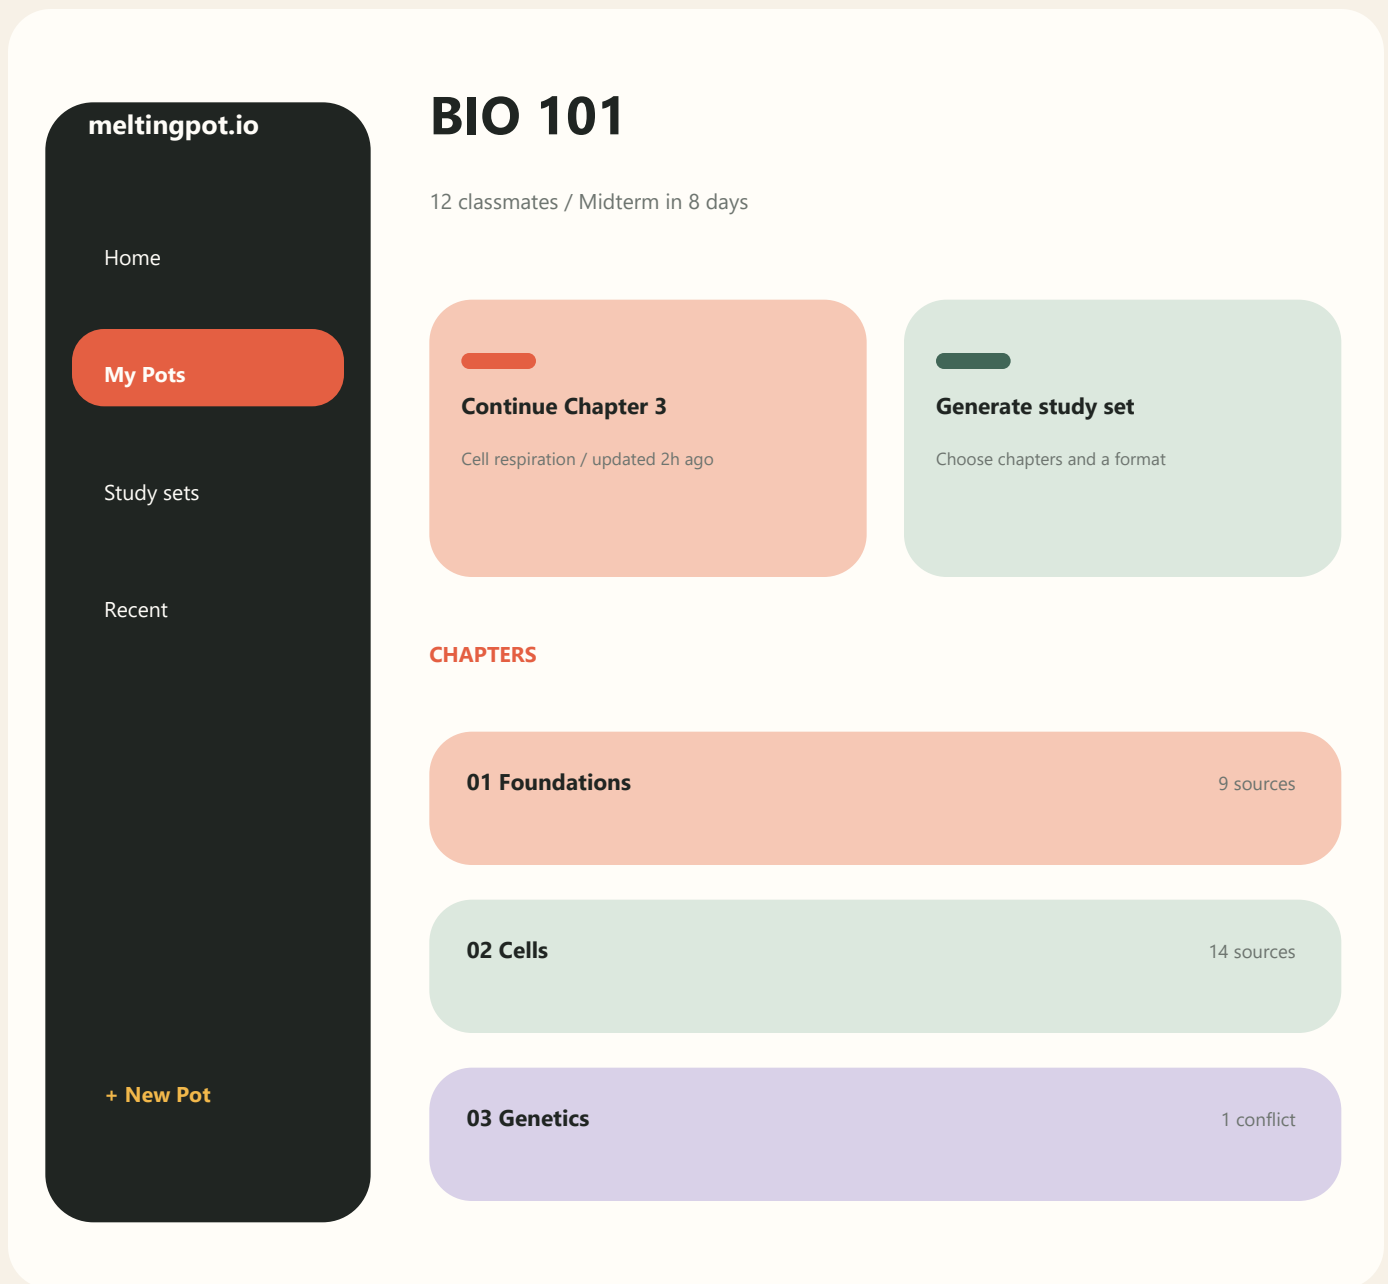

Ink

TYPOGRAPHY

Bold, friendly display type

A clean sans serif for notes, sources, controls, and dense study content. Use sentence case everywhere.

Everything begins inside a Pot.

Primary navigation

Home / Pots / Study sets / Recent

The shared guide is the hero.

Content should feel readable and alive. Sources, contributors, and AI organization support the guide instead of competing with it.

Chapter 3

Genetics and inheritance

14 ingredients

organized

3.1 Mendelian inheritance

Traits are passed through units of inheritance called genes. Alleles are alternative forms of the same gene, and their combinations shape an organism's genotype.

Key idea

Dominant describes expression, not strength or frequency.

+ Add ingredient

Select. Melt. Study.

1 Select ingredients

Chapters 1-3

2 Choose a format

30 flashcards

3 Customize

Hard / key concepts

REAL PROGRESS COPY

- Reading 14 ingredients
- Grouping common topics
- **Melting repeated ideas**
- Checking disagreements
- Building 30 flashcards

Motion rules

Use soft bubbles, ingredient colors, and rising cards. Show honest stages, allow background processing, and support reduced motion.

Sweet, simple, and consistent.

Pot cards

Course name, member count, next exam, and one clear continue action.

Ingredient chips

Color-coded sources with contributor name and original-file access.

Status pills

Organized, updating, conflict, private, and shared - never color alone.

Study output cards

Format, selected scope, last generated time, and update availability.

Bottom action bar

Add ingredient, generate, edit, and ask - stable across chapters.

Empty states

One sentence, one illustration, and one obvious next action.

RESPONSIVE + ACCESSIBLE

Desktop uses a source rail and reading canvas. Mobile stacks sources below content, keeps generation in a bottom sheet, preserves keyboard and screen-reader structure, and honors reduced motion.

North star: the interface should make a pile of class notes feel calm, trustworthy, and ready to study.
